4. Org-babel Evaluating Programming Languages
5. Org-babel for music and others
6. Presenting with Org-beamer
7. Conclusion

Introduction

Purpose

To evaluate many features of orgmode, such as

- drawing with code
- evaluating results of code snippets
- exporting orgmode file to pdf slides

Introduction

How

Following tools are used in this file:

- [MSYS2](#) provides many tools and libraries
- [GraalVM](#) JDK supports Java, JS, R and more
- [GNU Emacs](#) with [kimim-emacs](#) configuration
- [Org Mode](#), including org-babel, org-export
- [TeXLive](#) with [beamertheme-kimim](#) style
- [PlantUML](#), [Graphviz](#), \LaTeX [tikz](#) package
- [Inkscape](#) to convert svg to pdf, during orgmode-pdf exporting

Outline

1. Introduction

2. Preparation

3. Drawing in code

4. Org-babel Evaluating Programming Languages

5. Org-babel for music and others

6. Presenting with Org-beamer

7. Conclusion

Preparation

Emacs settings

You may need to use kimim-emacs configuration:

```
# backup existing emacs config
cd ~ && mv .emacs .emacs-backup && mv .emacs.d .emacs.d-backup
# clone this config
git clone https://github.com/kimim/kimim-emacs
# copy default .emacs to ~
cp kimim-emacs/.emacs ~
```

Preparation

Emacs and Orgmode version

Firstly, let's check GNU Emacs¹ and Orgmode² version:

```
(concat (emacs-version)
        "\nOrgmode " (org-version))
```

```
GNU Emacs 28.0.50 (build 6, x86_64-w64-mingw32)
  of 2021-08-31
Orgmode 9.4.4
```

¹<https://www.gnu.org/software/emacs>

²<https://orgmode.org>

Preparation

TexLive and Beamer Theme

Install TexLive³ to <texlive-path> and clone beamertheme-kimim⁴, and update T_EX cache:

```
git clone https://github.com/kimim/beamertheme-kimim \  
  <texlive-path>/texmf-local/tex/latex/beamertheme-kimim  
mktexlsr
```

³<http://tug.org/texlive>

⁴<https://github.com/kimim/beamertheme-kimim>

Preparation

Inkscape version

Install Inkscape⁵ to convert SVG image to PDF.
This is inkscape version on my Windows 10:

```
inkscape --version
```

Inkscape 1.0.2-2 (e86c870879, 2021-01-15)

⁵<https://inkscape.org>

Outline

1. Introduction
2. Preparation
- 3. Drawing in code**
4. Org-babel Evaluating Programming Languages
5. Org-babel for music and others
6. Presenting with Org-beamer
7. Conclusion

Drawing in code

PlantUML settings in Emacs

Download plantuml.jar⁶, and set jar-path

```
(require 'url-handlers)
(require 'ob-plantuml)
(url-copy-file "https://nchc.dl.sourceforge.net/project/plantuml/plantuml.jar"
              "./plantuml.jar" t)
(setq org-plantuml-jar-path "./plantuml.jar")
```

⁶<https://plantuml.com>

Drawing in code

PlantUML version

Here is the version info on my machine, including JVM, dot and graphviz:

```
(shell-command-to-string  
  (concat  
    "java -jar " org-plantuml-jar-path " -version"))
```

PlantUML version 1.2021.8 (Sat Jun 26 16:20:59 CST 2021)

(GPL source distribution)

Java Runtime: OpenJDK Runtime Environment

JVM: OpenJDK 64-Bit Server VM

Default Encoding: Cp1252

Language: en

Country: US

PLANTUML_LIMIT_SIZE: 4096

Dot version: dot - graphviz version 2.44.1 (20200629.0846)

Installation seems OK. File generation OK

Drawing in code

Sequence Diagram

Let's draw a simple sequence diagram with this plantuml code:

```
@startuml
hide footbox
hide unlinked
Alice -> Bob: Authentication Request
Bob --> Alice: Authentication Response
Alice -> Bob: Another authentication Request
Alice <-- Bob: Another authentication Response
@enduml
```

Drawing in code

Class Diagram

A simple class diagram

```
@startuml
class Car
Driver - Car : drives >
Car *- Wheel : have 4 >
Car -- Person : < owns
@enduml
```

Drawing in code

tikz logo

```
\begin{tikzpicture}
  \filldraw[blue] (0,0) rectangle (-4,-2);
  \filldraw[blue,rotate=-30] (0,0) rectangle (1,-0.2);
  \filldraw[blue] (-4,0) circle (0.2);
  \filldraw[blue] (-4,-2) rectangle (-3,-3);
  \filldraw[blue] (0,-2) rectangle (-1,-3);
  \filldraw[blue] (-4,0) rectangle (-5.5,-1.5);
\end{tikzpicture}
```

Drawing in code

tikz background

```
\begin{tikzpicture}
  \fill[left color=blue,right color=white,shading angle=90,line width=0] (0,0) rectangle (4,-2);
  \begin{scope}[shift={(1,-1)}]
    \fill[red!30!white,semitransparent] ( 90:0.3) circle (0.5);
    \fill[green!30!white,semitransparent] (210:0.3) circle (0.5);
    \fill[blue!30!white,semitransparent] (330:0.3) circle (0.5);
  \end{scope}
\end{tikzpicture}
```

```

Org-babel Evaluating Programming Languages

C

```
printf("%s is %d years old\n", "C programming language", year-1972);
```

C programming language is 49 years old

Org-babel Evaluating Programming Languages

C++

```
cout << "C++ is " << year-1979 << " years old" << endl;
```

C++ is 42 years old

Org-babel Evaluating Programming Languages

Clojure

```
(println "Clojure is" (- year 2005) "years old")
```

Clojure is 16 years old

Org-babel Evaluating Programming Languages

ClojureScript

TODO

Org-babel Evaluating Programming Languages

Java

TODO: can pass variable to java

```
public class Main{  
    public static void main(String[] args){  
        System.out.println("Java is " + (2021-1995) + " years old");  
        return;  
    }  
}
```

Java is 26 years old

Org-babel Evaluating Programming Languages

Python

Check Python version in shell:

```
python --version
```

Python 3.9.6

Evaluate Python code:

```
print("Python is " + str(year - 1991) + " years old")
```

Python is 30 years old

Org-babel Evaluating Programming Languages

Rust

```
(package-install 'ob-rust)
```

TODO: cannot pass variable to rust

```
fn main() {  
    println!("Rust is {} years old", 2021 - 2016);  
}
```

Org-babel Evaluating Programming Languages

Go

TODO

```
package main
import ("fmt")

func main(){
    fmt.Println("emacs")
}
```

Org-babel Evaluating Programming Languages

R

TODO

Outline

1. Introduction
2. Preparation
3. Drawing in code
4. Org-babel Evaluating Programming Languages
5. Org-babel for music and others
6. Presenting with Org-beamer
- 7. Conclusion**

Conclusion

Key Takeaways

- Emacs is a long lasting, and wonderful text editor
- Orgmode is an awesome plain text format
- \LaTeX is great typesetting tool
- Beamer is a \LaTeX package for preparing presentation
- Thus, using these tools within Emacs is cool!
