- 2. Preparation
- 3. Drawing in code
- 4. Org-babel Evaluating Programming Languages
- 5. Org-babel for music and others
- 6. Presenting with Org-beamer
- 7. Conclusion

Introduction

Purpose

To evaluate many features of orgmode, such as

- · drawing with code
- evaluating results of code snippets
- exporting orgmode file to pdf slides

All the orgmode "source text" is hosted in github: https://github.com/kimim/orgmode-examples

Introduction

How

Following tools are used in this file:

- MSYS2 provides many tools and libraries
- GraalVM JDK supports Java, JS, R and more
- GNU Emacs with kimim-emacs configuration
- Org Mode, including org-babel, org-export
- · TexLive with beamertheme-kimim style
- PlantUML, Graphviz, Mermaid, ditaa, LATEX tikz package
- LilyPond for music notation
- · Inkscape to convert svg to pdf, during orgmode-pdf exporting

orgmode examples

1. Introduction

2. Preparation

- 3. Drawing in code
- 4. Org-babel Evaluating Programming Languages
- 5. Org-babel for music and others
- 6. Presenting with Org-beamer
- 7. Conclusion

Emacs settings

You may need to use kimim-emacs configuration:

```
# backup existing emacs config
cd ~ && mv .emacs .emacs-backup && mv .emacs.d .emacs.d-backup
# clone this config
git clone https://github.com/kimim/kimim-emacs
# copy default .emacs to ~
cp kimim-emacs/.emacs ~
```

Emacs and Orgmode version

Firstly, let's check GNU Emacs¹ and Orgmode² version:

```
(concat (emacs-version)
    "\nOrgmode " (org-version))
```

```
GNU Emacs 29.0.50 (build 1, x86_64-w64-mingw32) of 2021-10-03 Orgmode 9.5
```

https://www.gnu.org/software/emacs

²https://orgmode.org

Text ive and Beamer Theme

Install $TexLive^3$ to <texlive-path> and clone beamertheme-kimim⁴, and update T_EX cache:

```
git clone https://github.com/kimim/beamertheme-kimim \
     <texlive-path>/texmf-local/tex/latex/beamertheme-kimim
mktexlsr
```

³http://tug.org/texlive

⁴https://github.com/kimim/beamertheme-kimim

Inkscape version

Install Inkscape⁵ to convert SVG image to PDF.

This is inkscape version on my Windows 10:

inkscape --version

Inkscape 1.1.1 (3bf5ae0d25, 2021-09-20)

⁵https://inkscape.org

orgmode examples

- 1. Introduction
- 2. Preparation
- 3. Drawing in code
- 4. Org-babel Evaluating Programming Languages
- 5. Org-babel for music and others
- 6. Presenting with Org-beamer
- 7. Conclusion

PlantUML settings in Emacs

Download plantuml.jar⁶, and set jar-path

⁶https://plantuml.com

PlantUML version

Here is the version info on my machine, including JVM, dot and graphviz:

```
(shell-command-to-string
  (concat
   "java -jar " org-plantuml-jar-path " -version"))
```

```
PlantUML version 1.2021.8 (Sat Jun 26 16:20:59 CST 2021)
(GPL source distribution)
Java Runtime: OpenJDK Runtime Environment
JVM: OpenJDK 64-Bit Server VM
Default Encoding: GBK
Language: en
Country: US

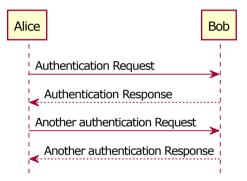

PLANTUML_LIMIT_SIZE: 4096

Dot version: dot - graphviz version 2.44.1 (20200629.0846)
Installation seems OK. File generation OK
```

Sequence Diagram

Let's draw a simple sequence diagram with this plantuml code. We will use noweb [1] technique here to add code from other place with <<name-of-code-snippet>>.

```
@startuml
hide footbox
hide unlinked
Alice -> Bob: Authentication Request
Bob --> Alice: Authentication Response
Alice -> Bob: Another authentication Request
Alice <-- Bob: Another authentication Response
@enduml</pre>
```

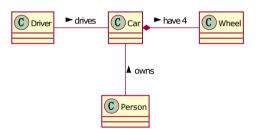

Class Diagram

A simple class diagram

```
Gstartuml
class Car
Driver - Car : drives >
Car *- Wheel : have 4 >
Car -- Person : < owns
Genduml</pre>
```

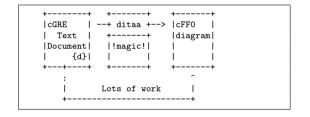

ditaa settings in Emacs

Download ditaa.jar⁷, and set jar-path

⁷https://sourceforge.net/projects/ditaa/files/latest/download

ditaa

mermaid settings in Emacs

Install mermaid with npm:

```
npm install -g @mermaid-js/mermaid-cli
```

Configure mermaid in emacs

```
(use-package ob-mermaid
  :custom
  (ob-mermaid-cli-path "~/node_modules/.bin/mmdc.cmd")
  :config
  (add-to-list 'org-babel-load-languages '(mermaid . t)))
```

mermaid version

```
(shell-command-to-string
  (concat ob-mermaid-cli-path " --version"))
```

8.12.1

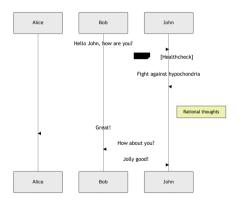

mermaid

Installation and Configuration, see

kimim-emacs#mermaid

```
sequenceDiagram

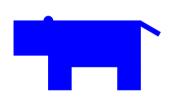

participant Alice
participant Bob
Alice->>John: Hello John, how are you?
loop Healthcheck
    John->>John: Fight against hypochondria
end
Note right of John: Rational thoughts
John->>Alice: Great!
John->>Bob: How about you?
Bob-->>John: Jolly good!
```

License GPLv3+: GNU GPL version 3 or later <a href="http://gnu.org/licenses/gpl.html">http://gnu.org/licenses/gpl.html</a>>
```

This is free software; you are free to change and redistribute it. There is NO WARRANTY, to the extent permitted by law.

C

```
printf("%s is %d years old\n", "C programming language", year-1972);
```

C programming language is 49 years old

C++

```
cout << "C++ is " << year-1979 << " years old" << endl;
```

C++ is 42 years old

Clojure

According to Rich Hickey [2], Clojure was initially designed in 2005:

```
(println "Clojure is" (- year 2005) "years old")
```

Clojure is 16 years old

ClojureScript

TODO

Java

TODO: can pass variable to java

```
public class Main{
   public static void main(String[] args){
        System.out.println("Java is " + (2021-1995) + " years old");
        return;
   }
}
```

Java is 26 years old

Python

Check Python version in shell:

```
python --version
```

Python 3.9.6

Evaluate Python code:

```
print("Python is " + str(year - 1991) + " years old")
```

Python is 30 years old

Rust

```
(package-install 'ob-rust)
```

TODO: cannot pass variable to rust

```
fn main() {
    println!("Rust is {} years old", 2021 - 2016);
}
```

Go

TODO

```
package main
import ("fmt")

func main(){
   fmt.Println("emacs")
}
```

R

TODO

orgmode examples

- 1. Introduction
- 2. Preparation
- 3. Drawing in code
- 4. Org-babel Evaluating Programming Languages
- 5. Org-babel for music and others
- 6. Presenting with Org-beamer
- 7. Conclusion

Org-babel for music and others

Install LilyPond

LilyPond [3] is a system for automated music engraving.

You can get the installation file from https://lilypond.org/download.html and install it.

Check the version:

```
lilypond --version
```

```
GNU LilyPond 2.22.1
```

```
Copyright (c) 1996--2021 by
Han-Wen Nienhuys <a href="mailto:hanwen@xs4all.nl">han-Wen Nieuwenhuizen <janneke@gnu.org>and others.</a>
```

This program is free software. It is covered by the GNU General Public License and you are welcome to change it and/or distribute copies of it under certain conditions. Invoke as `lilypond --warranty' for more information.

Org-babel for music and others

LilyPond

```
\relative c' {
  \chordmode {c1}
  \chordmode {e1}
  \chordmode {f1}
  \chordmode {g1}
  \chordmode {g1}
  \chordmode {b1}
}
```

Phoenix! Phoenix! How virtue has declined.

It can't wait for the future or catch up with what's behind.

sage man works his ways,

When the Dao has disappeared the Sage lives out his days.

In times like these just keep far from the shackles and the blade. Good fortune's lighter than a feather, but none knows how to bear it, Disaster's heavier than the earth, but

Enough! Enough! These toils of virtue serving man,

Danger! Danger! Escape! –draw the line in the sand.

Brambles, brambles, don't cut me as go,

Twisting, twisting, my feet stay free of woe.

orgmode examples

- 1. Introduction
- 2. Preparation
- 3. Drawing in code
- 4. Org-babel Evaluating Programming Languages
- 5. Org-babel for music and others
- 6. Presenting with Org-beamer
- 7. Conclusion

Conclusion

Key Takeaways

- Emacs is a long lasting, and wonderful text editor
- Orgmode is an awesome plain text format
- LATEX is great typesetting tool
- Beamer is a LATEX package for preparing presentation
- Thus, using these tools within Emacs is cool!
